About Me

First and foremost, I've always loved challenging and slightly different kinds of work. This same interest is what gradually drew me into the world of artificial intelligence and machine learning, and led me to continue my professional path in this field. Currently, I work as a machine learning engineer, developing data-driven solutions, and I enjoy solving real-world problems using machine learning models. I always try to stay up to date with the latest advancements in this field and continuously improve my skills. Alongside continuous learning, teamwork is also one of my favorite aspects of the work environment. I believe the best ideas and results come about when team members bring their knowledge, experience, and perspectives together and collaborate toward a shared goal.
